Why Invest in this fund?

- Aims to generate income in U.S. dollars through a high-quality portfolio with a minimum average credit quality of A- (10% limit on High Yield) and an emphasis on capital preservation
- In today's complex bond market, the Fund's experienced manager will actively manage duration between 0 and 1.5 years, limiting market risk through modern portfolio strategies, pursuing capital preservation and maintaining liquidity
- Primarily exposed to U.S. dollars, whether through U.S. securities or currency management. Also, purchases, redemptions, income distributions and performance reporting in U.S. dollars

Risk Tolerance

LOW	MEDIUM	HIGH
-----	--------	------

* Effective June 1, 2022, the redemption charge purchase option, and the low-load purchase option are no longer available for purchase, including those made through systematic purchase plans such as pre-authorized contribution plans. Switching from securities of a Mackenzie Fund previously purchased under the redemption charge or low-load purchase options to securities of another Mackenzie Fund, under the same purchase option, will continue to be available until such redemption schedules expire.

** The Index is an unmanaged index comprised of U.S. dollar denominated investment grade corporate debt securities publicly issued in the U.S. domestic market with less than one year remaining term to final maturity.

*** The major holdings of the Fund may, but do not necessarily, represent the largest holdings of the Fund. Rather, the major holdings are selected for their overall significance in evaluating the investment portfolio.

† Series SC — For fixed income funds, this series is the front-end load purchase option, equivalent to series A.

‡ Commissions, trailing commissions, management fees, and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns as of January 31, 2025 including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution, or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. Standard deviation provides a measure of the variability of returns that have occurred relative to the average return. The higher the standard deviation, the greater is the range of returns that has been experienced. Standard deviation is commonly used as a measure of risk.
